Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA was conducted in May 2005 and no WBCR was observed. The stream did not meet the maximum depth or average depth criterion in any of the 4 sites evaluated. An interview revealed that some people canoe on the stream. Because the stream is shallow overall, the committee recommends removing the WBCR designation. The committee also recommends that this stream be evaluated for SCR. For additional information concerning this stream, refer to UAA # 0210.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
